KDF is a company limited by guarantee. It is registered as a charity under the Charities Act 1994 and is governed and monitored by the Charity Sector Administrator, the Ministry of Health on behalf of the Commissioner of Charities.

Charity Registration No. 1156 dated 22 February 1996
Company Registration No. 199600830Z
GST Registration No. 19-9600830-Z
IPC Registration No HEF0021/G
(Status renewed up to 29 October 2021)

Our Vision

To ensure that no kidney patient will perish because of the lack of funds for dialysis and to find a cure for kidney and kidney-related diseases.

Our Mission

To look after needy people with end-stage kidney disease through quality care, education and research.

Our Niche

KDF is focused on serving needy kidney patients in Singapore.

Pillars of KDF

At KDF, our service to the community is exemplified by the following pillars:

Treatment

We extend hope and the lives of needy kidney patients by providing them with dialysis treatment.

Education

We educate our patients and the public on kidney-related information to help them make informed choices regarding their health.

Research

We fund clinical research aimed at finding a cure for kidney and kidney-related diseases.

Message from the Chairman

Dr Lim Cheok Peng

Chairman, Kidney Dialysis Foundation

Since its founding in 1996, the Kidney Dialysis Foundation (KDF) has continued to forge ahead and stay true to our mission – to look after needy individuals with end-stage kidney disease through quality care, education, and research.

Our purpose runs in tandem with the lives of the kidney patients that we serve. 80% of KDF's patients belong to the lowest 10% income tier in Singapore, surviving on less than \$800 monthly. To put things in perspective, the full cost of dialysis, excluding medication and other treatments will set a patient back by more than \$2000 monthly. This is an impossible amount for the poor to afford. As such, providing patients with subsidised dialysis treatments

and medication remains as our lifelong commitment to them.

As one of the first non-profit charity organisations that provides specialised care for underprivileged kidney patients, no efforts were spared to ensure that they do not perish from a lack of funds to pursue dialysis treatments. This means that continuous financial support is required to keep our operations running.

Today, we have since expanded to a total of 3 centres – Kreta Ayer, Ghim Moh and Bishan, with a new fourth dialysis centre in Admiralty Link nearing completion. Currently, 80% of KDF patients qualify for fully subsidised dialysis treatments

and medication, effectively relieving their financial burdens. Till date, KDF has helped more than 900 patients over 25 years, and we anticipate an increase once our new centre at Admiralty Link is operationally ready.

In just slightly over a year, the COVID-19 pandemic has brought about its fair share of new ills and inconveniences. But this was also complemented by new opportunities and milestones for us. It has forced us to adapt and advance our processes and technologies beyond our plans. Teleconsultations between our patients and doctors, and the use of virtual work tools have become the new normal, and we have seamlessly integrated it into our workflows at the dialysis centres and office.

While we continue to fortify and complement our business continuity plans with remote solutions, the question remains - How can we make our efforts sustainable for the next 25 years?

Our first step is to adopt a forward-thinking mindset. I believe that the answer lies in developing holistic education efforts with our patients and the larger community. While dialysis remains as a form of crucial treatment to sustain the lives of kidney patients, it remains as a stop-gap measure against kidney disease, and is unsustainable in the long run.

Hence, prevention remains as the key direction that we will head towards. Kidney patients who are living below the line face a different set of challenges. They are excluded from common living habits, regular activities, and are unable to afford the benefits of a healthy diet.

KDF will continue to reach out to our patients through our health education efforts, which includes advocating better eating habits and the importance of staying active.

While we take care of our patients' health needs, more can be done for their mental wellbeing. We will closely partner with the community to continue advocating for better kidney health and explore collaborations with different social service agencies to develop a more holistic take on patient care.

The virtual landscape has allowed us to extend our reach to a wider, younger audience, producing transformative results for the Foundation. We are also stepping up our outreach to the wider public through digital community events such as health webinars, and sporting events, where participants can learn the importance of good lifestyle choices and raise awareness about kidney disease.

2021 is a milestone year for KDF, as we commemorate 25 years of serving the needy. We have also learnt to adapt to the ups and downs that COVID-19 has brought and accept the new norms in the way we live, work and communicate. I believe that KDF's strength lies in staying true to our calling and striving to ensure that our patients receive the best possible care, regardless of circumstances. Where KDF is today, it is only made possible by the generous contributions from supporters like yourselves.

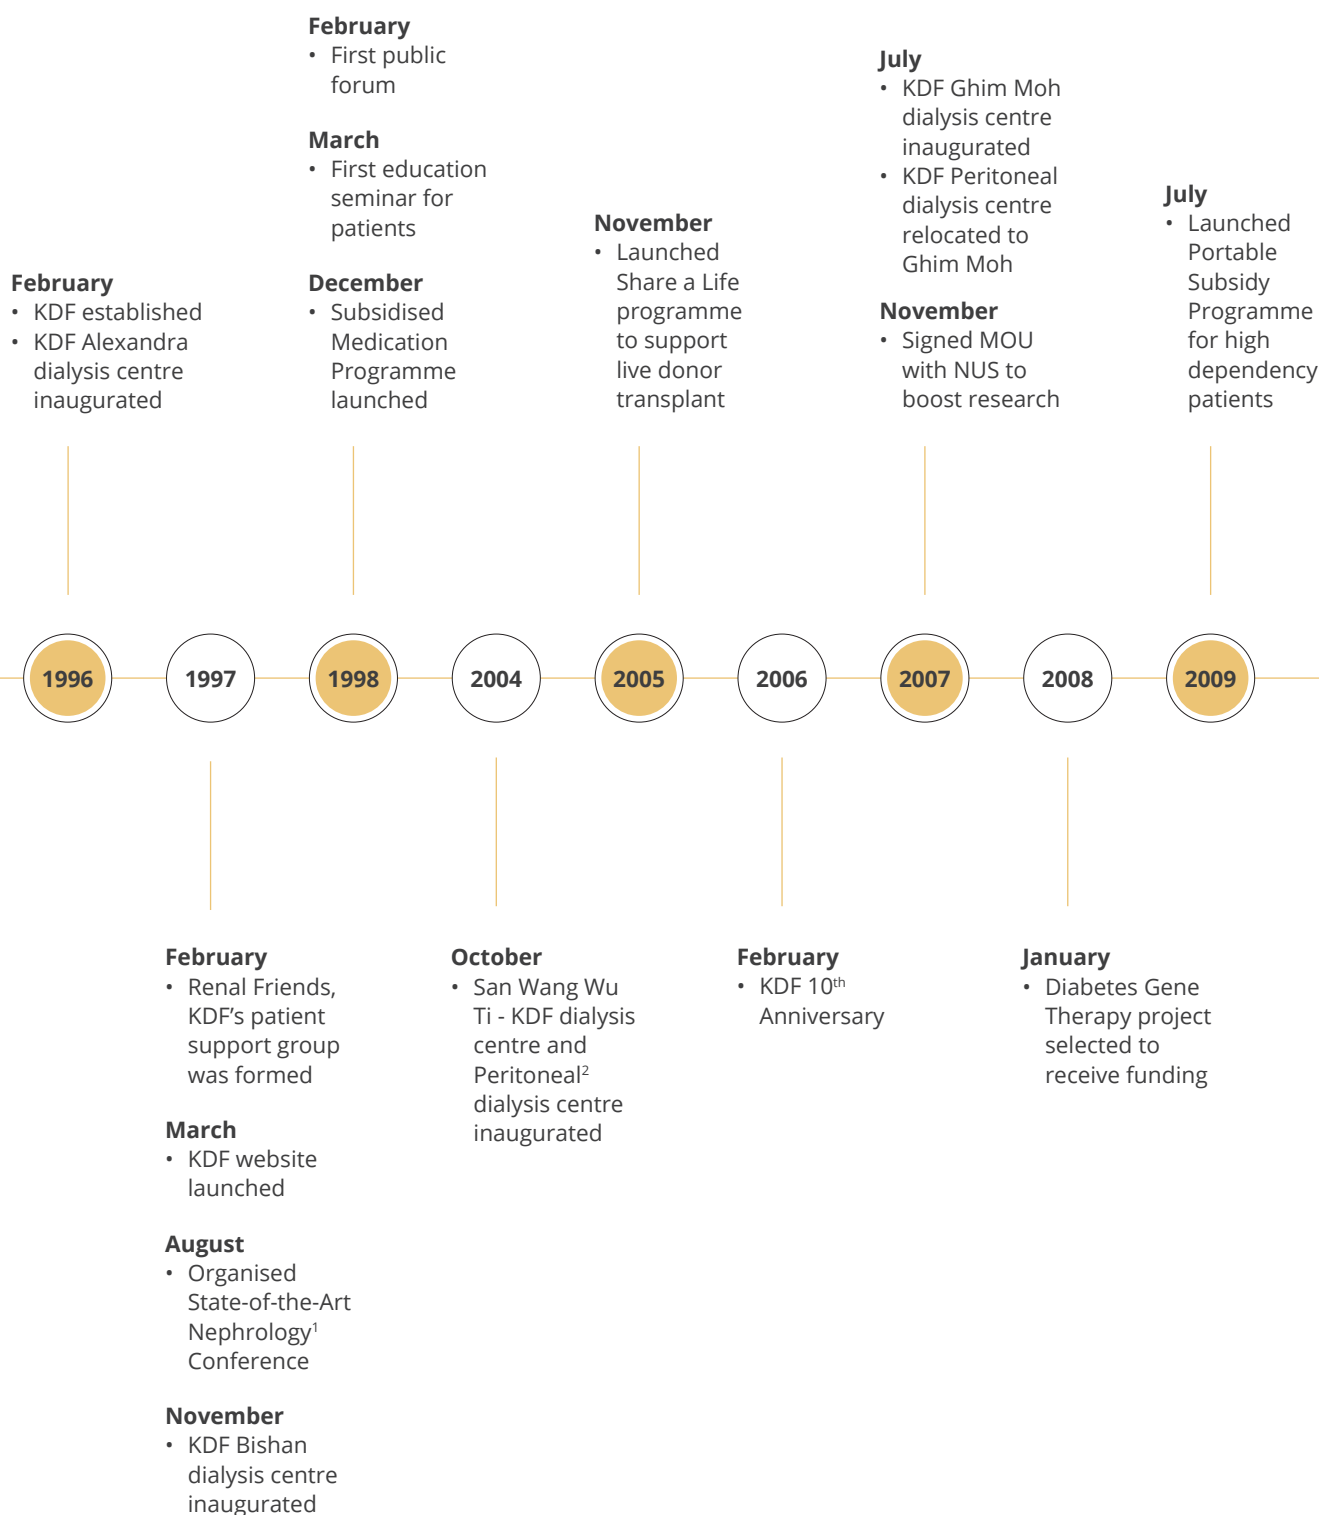

KDF's 25 years has been possible with the unconditional support from our partners and donors, KDF has successfully delivered the promise of a second chance at life to the needy patients that we serve all these years, and we will continue to do so in the foreseeable future.

Here's to many fulfilling years ahead!

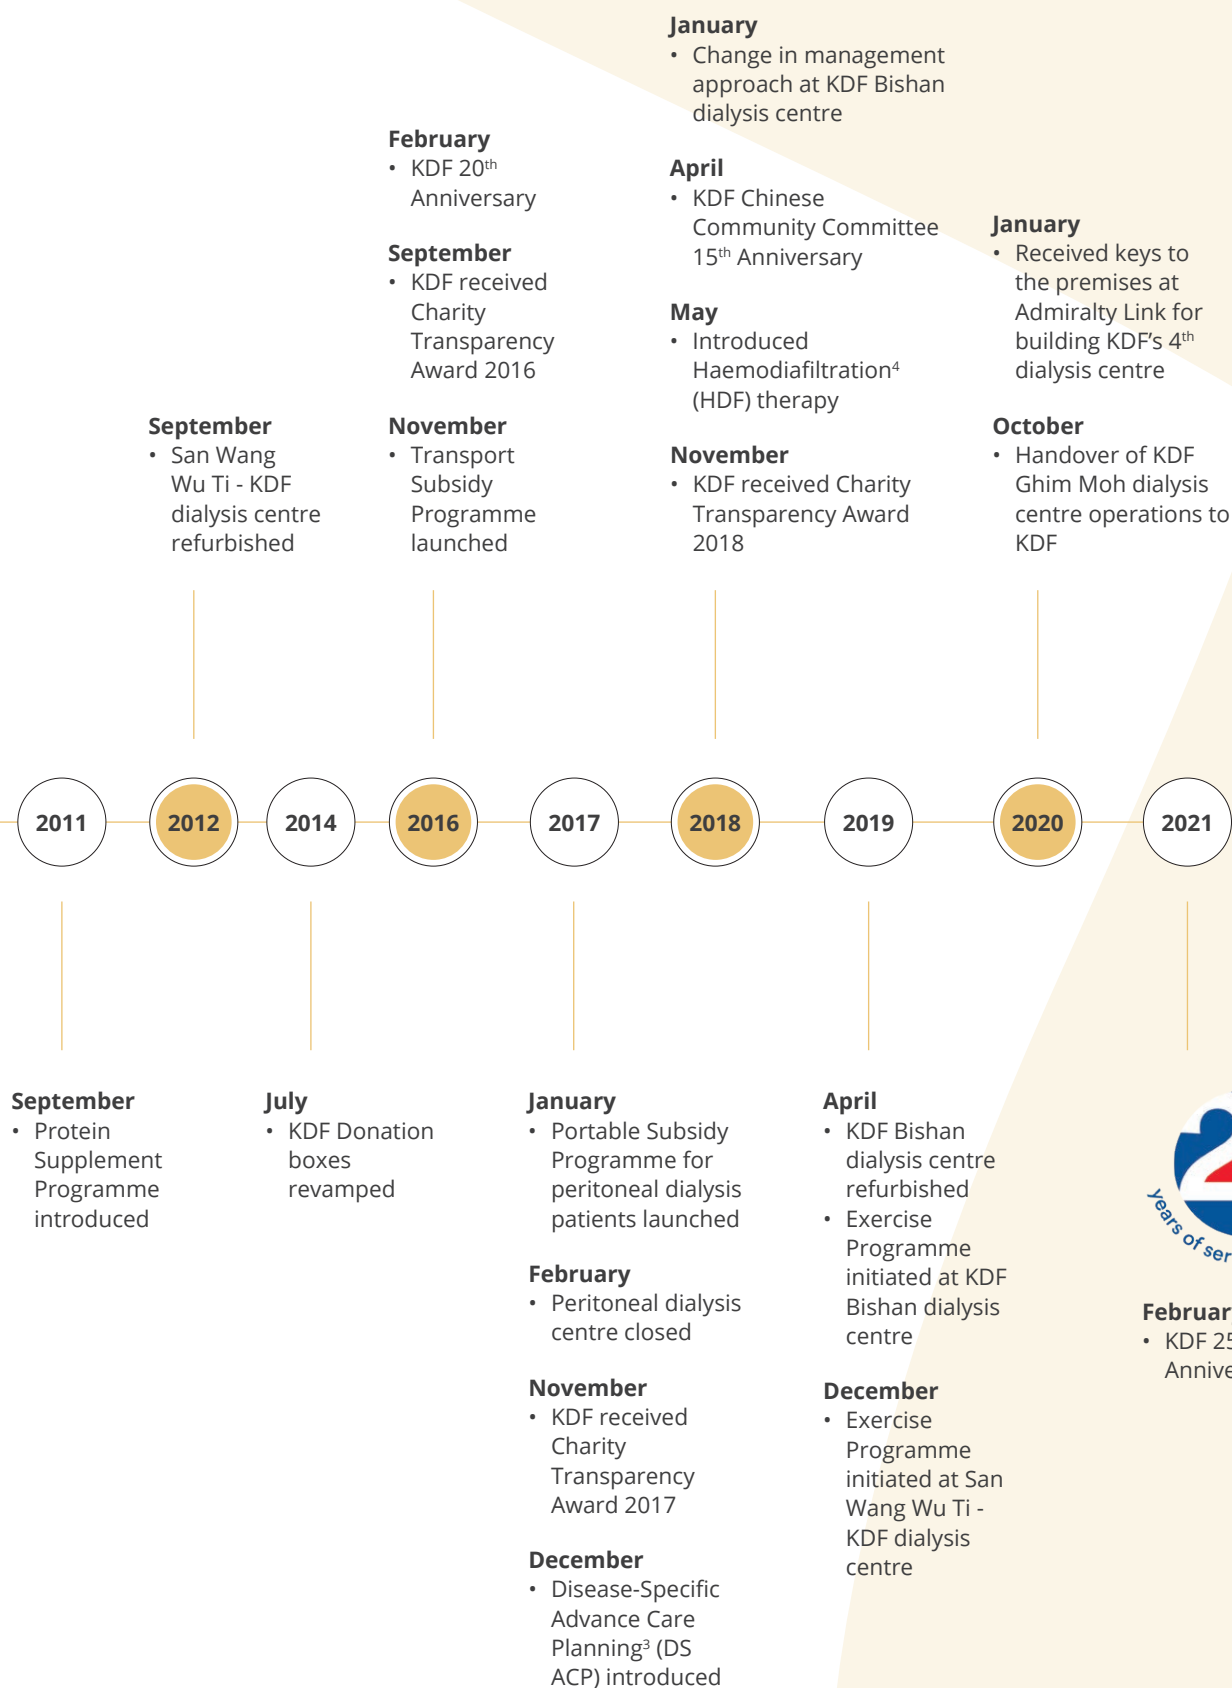

We will closely partner with the community to continue advocating for better kidney health and explore collaborations with different social service agencies to develop a more holistic take on patient care.

Foundation Milestones

¹ A speciality of internal medicine that focuses on the treatment of diseases that affect the kidneys.

² A treatment for kidney failure that uses the lining of the abdominal cavity, also known as the peritoneum, to filter blood inside the body.

³ The process of planning for future healthcare options through a series of voluntary, non-legally binding conversations with family members and doctors.

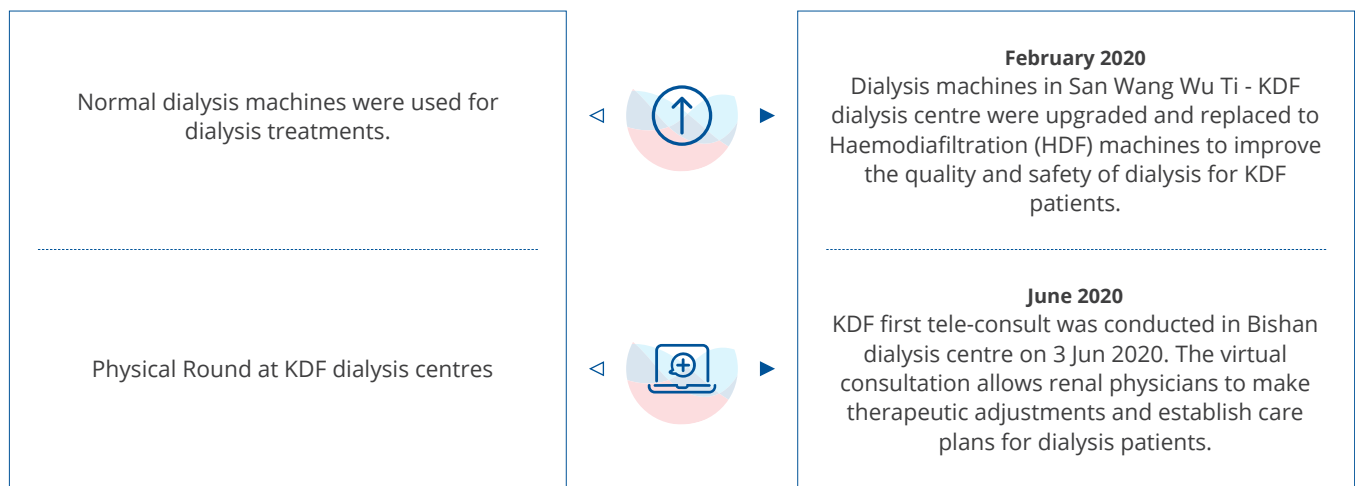

⁴ A process whereby concentrations of water-soluble substances in a patient's blood and an excess of fluid of a patient with renal insufficiency are corrected by a simultaneous combination of haemodialysis and haemofiltration.

Our Transformation

Our Progress

With the support from our stakeholders, including donors, volunteers, patients and nurses, KDF has been able to make significant progress over the years.

Clinical/Centre aspect:

Programmes:

Business Model:

Our COVID-19 Response

All dialysis staff, nurses, patients and their caregivers are required to do a TraceTogether check-in, complete a declaration form and measure their body temperatures before entering. They are also reminded to keep a 1m-distance from one another while waiting outside the centre via floor markings.

All our dialysis centre nurses are working in split teams to lower risk of potential cross-contamination and use telecommunications for updating of patient records and shift handovers. Our triage nurses are also required to don PPE throughout their shifts.

All external visitors and volunteers are not allowed into the dialysis centres.

Only non-ambulant or patients with dementia are allowed to have one accompanying caregiver. No caregivers are allowed into the centre for able-bodied patients. All our patients and their caregivers are also required to wear surgical masks upon entering the dialysis centres, and throughout the process of dialysis. We work closely with our social workers to ensure strict mask-wearing compliance amongst our patients.

All dialysis stations are also thoroughly wiped down and disinfected before every patient shift.

Patients with acute respiratory infection symptoms or have received a 'Health Risk Warning' / 'Health Risk Area' SMS by MOH will not be granted entry into the dialysis centre unless they are able to show proof of a negative ART test 24 hours before entry.

Registration Details

KDF is a company limited by guarantee. It is registered as a charity under the Charities Act 1994 and is governed and monitored by our Charity Sector Administrator, the Ministry of Health on behalf of the Commissioner of Charities.

Charity Registration No. 1156 dated 22 February 1996
Company Registration No. 199600830Z
GST Registration No. 19-9600830-Z
IPC Registration No HEF0021/G (Status renewed up to 29 October 2021)

Registered Office

Block 333 Kreta Ayer Road #03-33
Singapore 080333

Corporate Governance

Accountability and Transparency

KDF is in full compliance with the 'Governance Evaluation Checklist' listed on the Charity Portal of the Ministry of Culture, Community and Youth (MCCY). The Foundation's annual report and financial statements are available for scrutiny on the portal and on the KDF website. In recognition of its exemplary disclosure practices, KDF was awarded the *Charity Transparency Award* by the Charity Council in 2016, 2017 and 2018.

Board of Management and Renewal

The KDF board of directors convened once in the recently concluded financial year. Meeting attendance record is as reflected below:

Board Director	Designation	Attendance
		Sept 2020
Dr Lim Cheok Peng	Chairman	✓
Dr Gordon Ku	Honorary Chairman	×
Mr Cheng Wai Keung	Board Director	✓
Mr Stephen Lee Ching Yen	Board Director	✓
Mr Watson Ong	Board Director	✓
Mr Yeoh Oon Jin	Board Director	✓
Mr Wong Yew Meng	Board Director	✓
Mdm Chan May Ping	Board Director	✓
Mr Chan Soo Sen	Board Director	✓
Mr Uantchern Loh	Board Director	✓
Mr Roy Quek Hong Sheng	Board Director	✓
A/Prof Lina Choong	Medical Director	✓
Dr Grace Lee	Medical Director	✓

Table 1: Board meeting attendance for FY20/21.

One new director, Mr Roy Quek Hong Sheng, was appointed in the recently concluded financial year. Of the current board, five members have served on the KDF board for more than ten consecutive years. They include Mr Cheng Wai Keung and Mr Stephen Lee, who are the founding members of the Foundation. Reappointment of the four long-serving directors was based on their subject expertise and experience in managing the Foundation, as well as their understanding of the charity sector and its related legislation in Singapore. It has also been a challenge to attract and recruit new directors.

Fund Allocation and Expenditure

The Charities (Fund-raising Appeals for Local and Foreign Charitable Purposes) Regulations require that the total fundraising expenses of a charity shall not exceed 30% of the total receipts from fundraising and sponsorships for that year. For FY20/21, the total fundraising expenses incurred by KDF was 16.71% of all donations raised for the year.

The Foundation remains committed to channelling a large portion of funds received into patient care by keeping money spent on publicity, fundraising and administration to a minimum. Below is the breakdown of the Foundation's expenditure for FY20/21:

Reserves Policy

KDF maintains a reserve policy to provide clarity on the Foundation's management of its reserves. The policy applies to that part of the Foundation's income funds that are freely available for its operating purposes. It excludes endowment funds, restricted funds and designated funds.

As at 31 March 2021, assuming KDF receives no income at all, the accumulated surplus would enable KDF to sustain the cost base of FY20/21 for 4.41 years. As dialysis treatment is a long-term commitment, it is the intention of the board of directors to ensure that the level of reserves is adequate to support KDF's programmes for its needy patients during their lifetime and fulfil its commitment towards education and research.

Top Executive Remuneration

The board of directors of the Foundation render their services on a voluntary basis and do not receive any remuneration. However, the general manager receives a remuneration that is approved by the board of directors. For FY20/21, two employees of the Foundation received an annual remuneration of above \$100,000.

Salary Range	Number of Executives
\$100,001 - \$150,000	2

Table 2: Top Executive Remuneration for FY20/21

Internal Controls and Audits

An independent third party commissioned by the board conducts annual internal audits to ensure that the operations of the Foundation are in compliance with the established guidelines and regulations set by the Commissioner of Charities, Sector Administrator and relevant government bodies. They also ensure that the Foundation adopts best practices recommended for the charity sector.

For FY20/21, Shared Services for Charities Limited was appointed as KDF's independent internal auditors. Over the course of the year, they reviewed the following areas:

- Cash and Investment Management; and Human Resource Payroll
- Receipts and Collections
- Fundraising
- Procurement and Payments
- Fixed Asset Management
- Human Resource and Payroll Processing (Bishan Centre)
- Procurement and Payment of Consumable (Bishan Centre)

Conflict of Interest Policy

KDF has policies in place to prevent and address actual and perceived conflict of interest that will affect the integrity, fairness and accountability of the Foundation. These policies are clearly stated in the Foundation's Code of Governance and Conduct and are adopted by the Foundation, board members and staff. In situations where a potential conflict of interest should arise, the board will evaluate the situation and the affected party will abstain from voting on the transaction. For this financial year, the Chairman, board members and staff have declared that they do not have any personal interest in the business transactions or contracts that KDF has entered into.

Whistleblowing Policy

KDF has in place a whistleblowing policy that is made known to all staff of the Foundation. The policy ensures that there are proper avenues for employees to raise concerns about actual or suspected improprieties and that all reports are taken seriously and investigated accordingly.

KDF maintains a zero tolerance policy towards fraud. This policy applies to members of the board, committee members, staff, volunteers and also to the Foundation's vendors, suppliers and partners, to the extent that the Foundation's resources or reputation may be involved or affected.

Our Programmes

The Foundation's mission has remained simple and clear - To look after needy people with end-stage kidney disease through quality care, education and research. KDF also provides complementary programmes, such as medication and transport subsidies and the Adopt-a-Patient programme.

*KDF operates three
haemodialysis
centres with a combined
patient
capacity of 318 seats.*

Exercise Programme

Patients with end-stage kidney disease have diminished physical functions and activity due to muscle wasting. They also have reduced visceral protein storage and physical function attributable to uremic myopathy and neuropathy⁵, which can be an influence to long term hospitalisation and mortality.

The exercise programme helps to improve overall fitness of our patients. Physical fitness is an essential component in helping patients overcome illness, maintaining physical health and cultivating discipline and perseverance.

Subsidised Dialysis Programme

KDF operates three haemodialysis centres with a combined patient capacity of 318 seats. The centres are located in Bishan, Kreta Ayer and Ghim Moh. Since 1996, KDF has been serving underprivileged patients by providing subsidies of varying amounts, according to their financial situation based on MOH means-test.

Portable Subsidy for Peritoneal Dialysis (PD)

The ongoing programme, launched in 2017, provides subsidies for routine blood tests and solution packages to needy patients, who choose to receive peritoneal dialysis in the comfort of their homes.

Portable Subsidy Programme for Haemodialysis (HD)

For high dependency haemodialysis patients who are unable to receive treatment at KDF dialysis centres due to their complex medical conditions, this programme enables them to dialyse in a suitable medical environment while still being able to benefit from KDF subsidies.

Subsidised Medication Programme

On top of dialysis treatments, patients also require medications to complement their treatment. With this programme, patients receive subsidies for the medications they require. Medications covered under this programme include:

Erythropoietin Injection (EPO), Calcijex, Venofer, Lanthanum Carbonate, Cinacalcet, Hepatitis Vaccination and Zemplar. Supplemental feeds for protein are also provided to patients at a highly subsidised rate.

Adopt-A-Patient Programme

Patients who are unable to afford the co-payment portion of their treatment fees due to financial difficulties receive a second-tier subsidy from KDF through this programme. The programme has significantly reduced and, in many cases, eliminated the out-of-pocket expenses for these patients.

Transport Subsidy Programme

The transport subsidy programme was launched in November 2016 to provide patients with a transport allowance for their journeys to and from the dialysis centres. Patients eligible for this programme are those with mobility issues or have moderate-to-high fall risk.

⁵ An accumulation of urea and other waste products in the body, leading to muscle and nerve damage

Holistic Patients Care

As part of its care spectrum, KDF adopts a comprehensive approach towards patients care, which encompasses quality treatment, regular reviews, continuous education, and addressing psychosocial needs.

Patient Orientation and Education

Upon qualifying for the programme, all new patients are educated on their treatment and the dialysis process by nursing personnel. A patient handbook comprising all the necessary information is distributed to all patients. On a periodic basis, patients are also educated by the primary nurse and dietician on their medication and dietary compliance.

Clinical Care and Regular Reviews

KDF dialysis centres are supported by a group of nephrologists from restructured hospitals and the private sector. Medical reviews of patients are conducted monthly and special arrangements are made with family physicians working in the vicinity of KDF dialysis centres for urgent medical cover, should the need arise.

KDF's Bishan and Ghim Moh dialysis centres are directly managed by the Foundation. Professional teams of nurses from an external service provider operates its San Wang Wu Ti — KDF dialysis centre, in accordance with the medical and nursing protocols established by KDF.

Hepatitis B Core Screening for Patients

To enhance patients' protection against the Hepatitis B virus (HBV), KDF initiated Hepatitis B core screening for patients. In FY20/21, 51% of KDF patients, who were HBsAg (surface antigen of Hepatitis B virus) negative and whose Anti-HBs (Hepatitis B antibodies) were less than 100, were screened to identify any possible occult Hepatitis B infection, which may be a potential cause of infection.

Psychosocial Support

To facilitate continuous learning and create opportunities for socialising and mutual bonding, KDF organises at least two patient outings events yearly, with the aim of enabling patients and their families to interact with one another and also gain necessary knowledge through seminars to better manage their care.

Due to the outbreak of the COVID-19 pandemic, the Patient Education Seminar and Outings have been cancelled for the year of 20/21.

By checking in regularly with our beneficiaries, KDF helps to connect

them with various organisations such as Meals On Wheels to care for their wellbeing. Patients are also referred to avenues for government assistance such as daycare arrangements, as well as financial support.

Continuing the practice of giving away festive vouchers every year each patient dialysing at the 3 centres receives a supermarket (NTUC Fairprice) voucher from KDF once a year. The vouchers are distributed by our social workers in accordance to the patient's religious conviction or race during the local major festive seasons - Chinese New Year, Hari Raya Aidifitri, Deepavali and Christmas.

KDF dialysis centres are supported by a group of nephrologists from restructured hospitals and the private sector.

Clinical Standards and Efficacy

Quality of care is central to KDF operations. To ensure this, procedures and standards have been put in place to ensure consistent and high-quality service delivery across KDF dialysis centres and encourage the continual education of its nurses.

Annually, a competency check on dialysis procedures is conducted on centre nursing staff in collaboration with the charge nurse of each centre.

Continuous Quality Improvement

Under the guidance of KDF's Medical Director, a team comprising the centre charge nurse of the dialysis centres and KDF nursing personnel regularly monitors the indicators of dialysis adequacy (KT/V) to achieve a level of 1.2 or greater. For FY20/21, 95.91% of KDF patients achieved this. Nutritional performance indicators such as albumin, potassium and phosphate levels in the patients have also been closely monitored.

Infection Control Audits

All KDF dialysis centres conduct infection control audits twice a year to ensure that patients receive a high standard of care in a safe environment. This helps to reduce any incidences of infection, thereby increasing both patient and staff safety. For FY20/21, two rounds of audits were held at KDF's three dialysis centres in September 2020 and March 2021. All centres achieved a rating of above 85%.

Clinical Drills

Medical emergencies which could occur in a dialysis setting include cardiac arrest, air embolism, suspected pyrogenic reactions, profound hypotension or hypertension and significant blood loss. Clinical drills for such medical emergencies are conducted annually at KDF dialysis centres to ensure that all nursing staff are adequately prepared

to recognise and respond to emergent patient medical conditions. In FY20/21, clinical drills were conducted and assessed at all three dialysis centres.

Glucose Monitoring

All registered nurses at KDF dialysis centres are certified to be proficient in the use of a glucometer to monitor patients' blood glucose level. They are also trained on how to assess and react when there are complications. An annual recertification test on glucose monitoring is conducted by the centre charge nurse to maintain staff competency.

Intravenous (IV) Administration of Medicines

A recertification on the administration of specific intravenous medicines for all registered nurses at KDF dialysis centres is conducted yearly by KDF nursing personnel and endorsed by the Foundation's Medical Director. A register of the approved staff for administering intravenous medication is kept by KDF nursing personnel and the charge nurses of the dialysis centres.

Staff Competency Check

Annually, a competency check on dialysis procedures is conducted on centre nursing staff in collaboration with the charge nurse of each centre. This ensures that the standards of practice

across all KDF dialysis centres are maintained according to KDF's nursing protocol and guidelines.

In-Service Education

As the field of nursing is constantly changing rapidly, in-service education is imperative for nurses to maintain their competencies and keep abreast of the latest developments in nursing care. Nursing related in-service education is regulated by Singapore Nursing Board, which awards 'Continuing Professional Education' (CPE) points for participants, and this is taken into account for renewal of practicing certificates.

Preceptor Coaching

KDF receives students from Nanyang Polytechnic's Advanced Diploma in Nephro-Urology for their clinical placement at its Bishan dialysis centre. To facilitate and optimise the students' learning, clinical preceptors completed a coaching course held at the Institute of Technical Education (ITE). This course enabled our clinical preceptors to better support the students during their clinical practicum, and enrich the students' learning experience in a dialysis setting.

Patients Profiles

Patients are typically referred to the Foundation by medical social workers and are subjected to means-testing⁶. KDF has served over 962 patients to date, 84 of whom have gained a new lease of life through kidney transplants.

Patient Statistics

Patients under the haemodialysis programme are cared for at KDF dialysis centres, while those under the peritoneal dialysis programme receive portable subsidies for their treatments and laboratory tests.

As at 31 March 2021, our total patient count stood at 288. Of these, 96% of our patients opted for haemodialysis.

Figure 1: Distribution of patients by treatment type

For patients who are unable to receive treatment at KDF dialysis centres due to their complex medical conditions, they will receive portable subsidies from KDF to dialyse at a private centre.

As at 31 March 2021, nine patients have benefitted from our portable subsidies.

⁶ Means-testing is used to determine the amount of subsidies each patient is eligible for. Persons from lower-income households will be granted higher subsidies under the means-testing framework

Age

Elderly patients (above 61 years old) form the largest segment of patients served at KDF, followed by those in the middle-age range (41 – 60 years old).

As at 31 March 2021, 61% of KDF patients were elderly and 35% were middle-aged, and 4% in the 40 years and younger age group.

Figure 2: Distribution of patients by age

Gender and Race

Gender distribution among KDF patients was fairly equal. In terms of racial composition, Chinese patients accounted for 68%, while Malay patients formed close to a quarter of the total patient population.

Figure 3: Distribution of patients by gender

Figure 4: Distribution of patients by race

Employment Status

20% of KDF patients were employed, with the rest either retired, homemakers or unable to find employment. Those employed were mostly blue-collar workers such as drivers, machine operators, cleaners or general workers.

Figure 5: Distribution of patients by employment type

Mobility

While the majority of our patients were independent, more than a quarter of our patients were either wheelchair-bound or required some form of assistance or supervision. Dialysis aides were hired to support these patients at our dialysis centres, so as to prevent injuries and accidents.

Figure 6: Distribution of patients by mobility

Patient Subsidy

KDF patients receive subsidies of varying amounts for their dialysis treatments depending on their household income. KDF provides a range of subsidies to our patients.

As at 31 March 2021, 83% of our patients did not have to pay any expenses for dialysis treatments.

Patient Out-of-Pocket Expenses	Patient Count		Total	Percentage
	HD	PD		
\$0	230	8	238	83
\$1-\$200	32	3	35	12
\$201-\$400	8	0	8	3
Above \$400	7	0	7	2
Total	277	11	288	100%

Table 1: Out-of-Pocket expenses of patients for dialysis treatments

Based on means-testing criteria set by the Ministry of Health (MOH), 93% of KDF's patients qualified to receive government subsidies. The table below shows the number of KDF patients who were under the various income bands under the MOH means-test.

Monthly per capita income	Patient Count		Total	Percentage
	HD	PD		
\$0-800	135	5	140	49
\$801 - 1,200	41	2	43	15
\$1,201 -1,900	51	1	52	18
\$1,901 -2,000	9	1	10	3
\$2,001 - 2,800	23	0	23	8
Above \$2,800	18	2	20	7
Total	277	11	288	100%

Fundraising

KDF relies on public funding to sustain our programmes for our underprivileged patients and to maintain our operations. For FY20/21, fundraising income accounted for about a quarter of the Foundation's total income.

Chinese Community Committee

Since its formation in 2003, fundraising directors and members of the Chinese Community Committee (CCC) have been dedicating their time, resources and personal networks to build and strengthen KDF's ties with the local Chinese community, associations, clans, and temples with the common aim of raising funds for the Foundation. Fundraising efforts during the lunar seventh month remains the primary responsibility of the CCC.

Lunar Seventh Month Fundraising

Since the formation of the CCC 17 years ago, the lunar seventh month has constantly been a notable month for the Foundation. Funds were raised from table-to-table solicitations and the auctioning of KDF charity icons at the different dinner sites. However, due to the Safe Management Measurements out in place, physical auctioning could not take place.

The virtual event raised a grand total of \$193,504.00.

KDF Sing for Charity

Sing for Charity 2020, an online singing performance, was organised in collaboration with the Serangoon Community Club (SRCC) to raise funds for KDF. A total of 10 performers came together to sing for a charitable cause.

The 2-hour long digital concert was live-streamed on Facebook and garnered 26,400 views. A total of \$94,516.00 was raised through this meaningful event.

Virtual Millennium Ride 2020

Into its eighth instalment, the KDF Millennium Ride was a charity

endurance ride jointly organised by KDF and local cycling group, Epic Cyclist. The ride originally was scheduled to start in Thailand on 27 February 2020 and to end in Singapore on 2 March 2020, covering a total of 1000KM. The ride has been postponed to a later date due to the COVID-19 pandemic.

The ride eventually took place virtually as the riders wanted to complete the commitment they had made while raising funds for our patients. A total of \$105,621.00 has been raised prior to the event.

KDF e-Flag Day 2020

Originally to be held on 31 October 2021, the physical flag day was cancelled due to the COVID-19 pandemic and an e-flag day was conducted instead.

A total of \$19,359.00 was raised through online donations.

Machine and Centre Sponsorship

Annually, KDF receives donations to support the running of our dialysis centres and for the purchase of dialysis machines and medical equipment.

This fiscal year, a total of \$157,816.00 was raised from machine and equipment-related donations. Additionally, \$101,665.00 was received from devotees and members of the San Wang Wu Ti Religious Society.

Legacy Giving

A legacy giving programme was launched by KDF in 2018 to cover planned giving, where members of the public could bequest part of their estates to KDF. The programme also included memorial giving, where donors could honor their departed loved ones by making a donation in memory of the deceased. In this fiscal year, a total of \$41,436.00 was raised through this programme.

Donation Boxes

Made possible by partnerships with retail outlet owners who are supportive of our cause, 69 KDF donation boxes could be found all over Singapore. Our partners include U Mart, Ong Jit Sang Sundries, Killiney Kopitiam, Kim San Leng (F&B) Group, Ubin First Stop Restaurant, Kwan Inn Vegetarian Food and many other independent retailers. As at 31 March 2021, a total of \$40,745.00 was raised from this project.

Fundraising Events	Amount Raised

Financial Statements

Kidney Dialysis Foundation Limited

(A Company Limited by Guarantee)

Registration Number: 199600830Z

Annual Report

Year ended 31 March 2021

KPMG LLP (Registration No. T08LL1267L), an accounting limited liability partnership registered in Singapore under the Limited Liability Partnership Act (Chapter 163A) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Directors' Statement

We are pleased to submit this annual report to the members of the Kidney Dialysis Limited Foundation (the "Foundation") together with the audited financial statements of the Foundation for the financial year ended 31 March 2021.

In our opinion:

- (a) the financial statements set out on pages 39 to 72 are drawn up so as to give a true and fair view of the financial position of the Foundation as at 31 March 2021 and the financial performance, changes in funds and cash flows of the Foundation for the year ended on that date in accordance with the provisions of the Singapore Companies Act, Chapter 50, Charities Act, Chapter 37 and other relevant regulations ("the Charities Act and Regulations") and Singapore Financial Reporting Standards; and
- (b) at the date of this statement, there are reasonable grounds to believe that the Foundation will be able to pay its debts as and when they fall due.

The Board of Directors has, on the date of this statement, authorised these financial statements for issue.

Directors

The directors in office at the date of this statement are as follows:

Dr Lim Cheok Peng - Chairman
Yeoh Oon Jin
Cheng Wai Keung
Stephen Lee Ching Yen
Watson Ong Choon Huat
Wong Yew Meng
Chan May Ping
Uantchern Loh
Chan Soo Sen
Roy Quek Hong Sheng (Appointed on 1 July 2020)

Principal Activities

The Foundation was incorporated on 1 February 1996 as a Foundation limited by guarantee and is registered as a charity under the Charities Act, Chapter 37 and other relevant regulations.

The principal activities of the Foundation during the financial year have been those relating to the provision of subsidised and/or free medical treatment and dialysis services for patients suffering from kidney and kidney related illnesses. These activities are funded by donations received from the general public and subsidies from the Government (administered by the Ministry of Health). The Foundation generally does not accept patients who are financially able to pay for dialysis treatment at private centres. There have been no significant changes in such activities during the financial year.

The Foundation's secondary strategic mission is to identify and support research in the area for the prevention, treatment and cure of kidney and kidney related diseases. The Foundation signed a memorandum of understanding in November 2007 with The National University of Singapore ("NUS") to collaborate in the area of research for the prevention, treatment and cure of kidney and kidney related diseases. To achieve this, a Research Fund was set up to solicit donations to support and fund research for the prevention, treatment and cure of kidney and kidney related diseases. In July 2011, the Foundation continued the collaboration with NUS with the signing of a 5-year gift agreement at an annual minimum pledge of \$350,000. In July 2016, the Foundation signed a gift agreement for the funding of \$1,200,000 for another 3 years to continue the Foundation's collaboration with NUS. In October 2018, the Foundation further continued the collaboration with NUS with the signing of a 3-year gift agreement for the funding of \$1,500,000. The gift agreement was discontinued by the Foundation upon approval during the Annual General Meeting held on 22 August 2019.

Directors' Statement

Directors' Interests

Directors, who are also members of the Foundation, are Mr Cheng Wai Keung, Mr Stephen Lee Ching Yen, Dr Lim Cheok Peng, Mr Yeoh Oon Jin and Mr Watson Ong. The members do not have a personal interest in the Foundation.

As the Foundation is a Foundation limited by guarantee and has no share capital, the statutory information required to be disclosed by the directors under Section 201 (6) (g) and Section 201 (12) of the Singapore Companies Act, Chapter 50 does not apply.

Neither at the end of, nor at any time during the financial year was the Foundation a party to any arrangement whose objects are, or one of whose objects is, to enable the directors of the Foundation to acquire benefits by means of the subscription to or acquisition of debentures of the Foundation or any other body corporate.

Share Options

As the Foundation is a Foundation limited by guarantee and has no share capital, the statutory information required to be disclosed under Section 201 (12) of the Singapore Companies Act, Chapter 50 does not apply.

Auditors

The auditors, KPMG LLP, have indicated their willingness to accept re-appointment.

On behalf of the Board of Directors

Dr Lim Cheok Peng
Director

Yeoh Oon Jin
Director

8 September 2021

Independent Auditors' Report

Members of the Foundation
Kidney Dialysis Foundation Limited
(A Company Limited by Guarantee)

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Kidney Dialysis Foundation Limited ('the Foundation'), which comprise the statement of financial position as at 31 March 2021, the statement of income and expenditure and other comprehensive income, statement of changes in funds and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 39 to 72.

In our opinion, the Foundation's financial statements are properly drawn up in accordance with the provisions of the Companies Act, Chapter 50 ('the Companies Act'), the Charities Act, Chapter 37 and other relevant regulations ('the Charities Act and Regulations'), and Financial Reporting Standards in Singapore ('FRSs') so as to give a true and fair view of the financial position of the Foundation as at 31 March 2021 and the financial performance, changes in funds and cash flows of the Foundation for the year ended on that date.

Basis for opinion

We conducted our audit in accordance with Singapore Standards on Auditing ('SSAs'). Our responsibilities under those standards are further described in the 'Auditors' responsibilities for the audit of the financial statements' section of our report. We are independent of the Foundation in accordance with the Accounting and Corporate Regulatory Authority *Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities* ('ACRA Code') together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information contained in the annual report. Other information is defined as all information in the annual report other than the financial statements and our auditors' report thereon.

We have obtained all other information prior to the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and directors for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Companies Act, the Charities Act and Regulations and FRSs and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Foundation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Foundation's financial reporting process.

Independent Auditors' Report

Members of the Foundation
Kidney Dialysis Foundation Limited
(A Company Limited by Guarantee)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Foundation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Foundation to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

Report on other legal and regulatory requirements

In our opinion, the accounting and other records required to be kept by the Foundation have been properly kept in accordance with the provisions of the Companies Act, and the Charities Act and Regulations.

During the course of our audit, nothing has come to our attention that causes us to believe that during the year:

- (a) the Foundation has not used the donation monies in accordance with its objectives as required under Regulation 11 of the Charities (Institutions of a Public Character) Regulations; and
- (b) the Foundation has not complied with the requirements of Regulation 15 of the Charities (Institutions of a Public Character) Regulations.

Note A

The transfer between Unrestricted General Fund and CST Fund relates to utilisation of funds granted by Ministry of Health. The transfer between Unrestricted General Fund and Research Fund relates to utilisation of funds for its approved designated purposes (see note 15).

The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements

These notes form an integral part of the financial statements.

The financial statements were authorised for issue by the Board of Directors on [date of signing].

1 DOMICILE AND ACTIVITIES

The Foundation was incorporated in the Republic of Singapore on 1 February 1996 as a Foundation limited by guarantee and is registered as a charity under the Charities Act, Chapter 37 and other relevant regulations. Its registered office is Block 333 Kreta Ayer Road, #03-33 Singapore 080333.

The Foundation is a registered member of the Ministry of Health's General Fund. The Foundation has also been granted Institution of a Public Character ("IPC") status since February 1996.

The principal activities of the Foundation are those relating to the provision of subsidised and/or free medical treatment and dialysis services for patients suffering from kidney and related illnesses. These activities are funded by donations received from the general public and subsidies from the Government (administered by the Ministry of Health). The Foundation generally does not accept patients who are financially able to pay for dialysis treatment at private centres.

The Foundation's secondary strategic mission is to identify and support research in the area for the prevention, treatment and cure of kidney and kidney related diseases. The Foundation signed a memorandum of understanding in November 2007 with The National University of Singapore ("NUS") to collaborate in the area of research for the prevention, treatment and cure of kidney and kidney related diseases. To achieve this, a Research Fund was set up to solicit donations to support and fund research for the prevention, treatment and cure of kidney and kidney related diseases. In July 2011, the Foundation continued the collaboration with NUS with the signing of a 5-year gift agreement at an annual minimum pledge of \$350,000. In July 2016, the Foundation signed a gift agreement for the funding of \$1,200,000 for another 3 years to continue the Foundation's collaboration with NUS. In October 2018, the Foundation further continued the collaboration with NUS with the signing of a 3-year gift agreement for the funding of \$1,500,000. The gift agreement will be used to fund research projects undertaken by NUS Medicine to prevent, treat and cure kidney and kidney-related diseases. On 22 August 2019, it was approved during the Annual General Meeting that the Research Fund will be discontinued by the Foundation.

2 BASIS OF PREPARATION

2.1 Statement of Compliance

The financial statements have been prepared in accordance with the Singapore Financial Reporting Standards ("FRS").

2.2 Basis of Measurement

The financial statements have been prepared on the historical cost basis except as otherwise stated in the notes below.

2.3 Functional and Presentation Currency

The financial statements are presented in Singapore dollars, which is the Foundation's functional currency.

2.4 Use of Estimates and Judgments

The preparation of the financial statements in conformity with FRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Notes to the Financial Statements

Management is of the opinion that there have been no critical judgments in applying the Foundation's accounting policies that would result in a significant effect on the amounts recognised in the financial statements or assumptions and estimation uncertainties that would have a significant risk of resulting in a material adjustment within the next financial year.

2.5 Changes in Accounting Policies

New standards and amendments

The Foundation has applied the following amendments to FRSs for the first time for the annual period beginning on 1 April 2020:

- *Amendments to References to Conceptual Framework in FRS Standards*
- *Definition of a Business* (Amendments to FRS 103)
- *Definition of Material* (Amendments to FRS 1 and FRS 8)
- *Interest Rate Benchmark Reform* (Amendments to FRS 109, FRS 39 and FRS 107)

The application of these amendments to standards does not have a material effect on the financial statements.

3 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently by the Foundation to all periods presented in these financial statements.

3.1 Financial Instruments

(i) Recognition and initial measurement

Non-derivative financial assets and financial liabilities

Trade receivables issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Foundation becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(ii) Classification and subsequent measurement

Non-derivative financial assets

On initial recognition, a financial asset is classified as measured at amortised cost.

Financial assets are not reclassified subsequent to their initial recognition unless the Foundation changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Financial assets at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Notes to the Financial Statements

Financial assets: Business model assessment

The Foundation makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Foundation's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Foundation's continuing recognition of the assets.

Financial assets that are held-for-trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Non-derivative financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Foundation considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Foundation considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable rate features;
- prepayment and extension features; and
- terms that limit the Foundation's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a significant discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Notes to the Financial Statements

Non-derivative financial assets: Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in statement of income and expenditure.

Non-derivative financial liabilities: Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost.

These financial liabilities are initially measured at fair value less directly attributable transaction costs. They are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in statement of income and expenditure.

(iii) Derecognition

Financial assets

The Foundation derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire; or
- it transfers the rights to receive the contractual cash flows in a transaction in which either:
 - substantially all of the risks and rewards of ownership of the financial asset are transferred; or
 - the Foundation neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

Transferred assets are not derecognised when the Foundation enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets.

Financial liabilities

The Foundation derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Foundation also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Foundation currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(v) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and fixed deposits that are subject to an insignificant risk of changes in their fair value. For the purpose of the statement of cash flows, fixed deposits with maturity greater than 90 days are excluded.

Notes to the Financial Statements

3.2 Plant and Equipment

Recognition and measurement

Items of plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the costs directly attributable to bringing the assets to a working condition for their intended use, and an estimate of the cost of dismantling and removing the items and restoring the site on which they are located when the Foundation has an obligation to remove the asset or restore the site. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of plant and equipment have different useful lives, they are accounted for as separate items (major components) of plant and equipment.

The gain or loss on disposal of an item of plant and equipment is recognised in statement of income and expenditure

Subsequent costs

The cost of replacing a component of plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Foundation, and its cost can be measured reliably. The carrying amount of the replaced component is derecognised. The costs of the day-to-day servicing of plant and equipment are recognised in statement of income and expenditure as incurred.

Depreciation

Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed and if a component has a useful life that is different from the remainder of that asset, that component is depreciated separately.

Depreciation is recognised in statement of income and expenditure on a straight-line basis over the estimated useful lives of each component of an item of plant and equipment, unless it is included in the carrying amount of another asset.

The estimated useful lives for the current and comparative years are as follows:

Air-conditioners	-	4 years
Computers	-	3 years
Furniture and fittings	-	3 years
Medical equipment	-	4 years
Office equipment	-	3 years
Renovations	-	3 years

Depreciation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted if appropriate.

Plant and equipment valued at less than \$1,000 are not capitalised and are expensed to statement of income and expenditure in the year of acquisition.

3.3 Intangible Assets

Intangible assets that are acquired by the Foundation and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses.

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in statement of income and expenditure as incurred.

Notes to the Financial Statements

Amortisation is calculated based on the cost of the asset, less its residual value. Amortisation is recognised in statement of income and expenditure on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

The estimated useful life for the current and comparative years is as follows:

Software - 3 years

Amortisation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted if appropriate.

3.4 Impairment

(i) Non-derivative financial assets

The Foundation recognises loss allowances for expected credit losses (ECLs) on financial assets measured at amortised cost.

Loss allowances of the Foundation are measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from default events that are possible within the 12 months after the reporting date (or for a shorter period if the expected life of the instrument is less than 12 months); or
- Lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

Simplified approach

The Foundation applies the simplified approach to provide for ECLs for all trade receivables. The simplified approach requires the loss allowance to be measured at an amount equal to lifetime ECLs.

General approach

The Foundation applies the general approach to provide for ECLs on all other financial instruments. Under the general approach, the loss allowance is measured at an amount equal to 12-month ECLs at initial recognition.

At each reporting date, the Foundation assesses whether the credit risk of a financial instrument has increased significantly since initial recognition. When credit risk has increased significantly since initial recognition, loss allowance is measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Foundation considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Foundation's historical experience and informed credit assessment and includes forward-looking information.

If credit risk has not increased significantly since initial recognition or if the credit quality of the financial instruments improves such that there is no longer a significant increase in credit risk since initial recognition, loss allowance is measured at an amount equal to 12-month ECLs.

The Foundation considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Foundation in full, without recourse by the Foundation to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Foundation is exposed to credit risk.

Notes to the Financial Statements

Measurement of ECLs

ECLs are probability-weighted estimates of credit losses. Credit losses are measured at the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Foundation expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Foundation assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of these assets.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Foundation determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Foundation's procedures for recovery of amounts due.

(ii) Non-financial assets

The carrying amounts of the Foundation's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the assets' recoverable amounts are estimated. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit ("CGU") exceeds its estimated recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU.

Impairment losses are recognised in statement of income and expenditure. Impairment losses recognised in respect of CGU are allocated to reduce the carrying amounts of the other assets in the CGU (group of CGU) on a pro rata basis.

Impairment losses recognised in prior financial years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Notes to the Financial Statements

3.5 Employee Benefits

(i) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expenditure/resource expended in statement of income and expenditure in the financial years during which services are rendered by employees.

(ii) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus if the Foundation has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

3.6 Grants

An unconditional grant and contribution is recognised in statement of income and expenditure as other income when the grant becomes receivable.

Government grants and contributions are recognised initially as grants received in advance at their fair value where there is reasonable assurance that they will be received and all required conditions associated with the grants and contributions will be complied with by the Foundation.

These grants and contributions that compensate the Foundation for expenses incurred are recognised in statement of income and expenditure as government subsidies on a systematic basis in the same financial years in which the expenses are recognised.

Grants and contributions utilised for the purchase/construction of depreciable assets are initially recorded as deferred capital grants on the statement of financial position. Deferred capital grants are then recognised in statement of income and expenditure over the financial years necessary to match the depreciation of the assets purchased or constructed with the related grants and contributions. Upon disposal of the plant and equipment, the balance of the related deferred capital grants is recognised in statement of income and expenditure to match the net book value of the assets written off.

Special Employment and Wage Credit Schemes

Cash grants received from the government in relation to the Special Employment and Wage Credit Schemes are recognised as incoming resources in the statement of income and expenditure upon receipt.

Jobs Support Scheme ("JSS")

JSS grant is recognised in the statement of income and expenditure as 'other income' on a systematic basis over the periods in which the Foundation recognises the related expenses, unless the conditions for receiving the grant are met after the related expenses have been recognised. In this case, a grant is recognised when it becomes receivable.

3.7 Leases

At inception of a contract, the Foundation assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Notes to the Financial Statements

Short-term leases and leases of low-value assets

The Foundation has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including IT equipment. The Foundation recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

3.8 Funds Structure

(i) General fund

The general fund is available for use at the discretion of the management in furtherance of the Foundation's general objectives and purposes. The fund is available to apply for general purposes of the Foundation as set out in its governing document.

Income generated and expenditure incurred in a general fund will be presented as unrestricted general income and expenditure, respectively.

(ii) Designated funds

The designated fund is available for use at the discretion of the management within particular projects in furtherance of the Foundation's objectives that the management have identified and earmarked.

Designated funds are funds which are part of the unrestricted general fund, but earmarked for a particular project. The designation is made for administrative purposes only and does not contain any legal restrictions in relation to the Foundation's discretion to apply the fund. Management of the Foundation will pass a Directors' Resolution to approve the designation fund for purposes of a particular project earmarked by the Foundation.

Designated fund is accounted for as part of the Foundation's unrestricted designated funds. Income generated and expenditure held in designated funds will be presented as designated general income and expenditure, respectively.

(iii) Restricted funds

Restricted fund is a fund subject to specific purpose, declared by the donor(s) or with their authority or created through a legal process, but still within the wider objectives of the Foundation. The restricted fund is available for use at the discretion of the management within specified projects in furtherance of the Foundations' objectives that have been identified by donors of the funds or communicated to donors when sourcing for the funds.

Restricted fund may be a restricted income fund, which is expendable at the discretion of the Foundation in furtherance of some particular aspect(s) of the objects of the Foundation, or may be a capital fund, where the assets are required to be invested or retained for actual use, rather than expended.

Restricted fund has to be separately accounted for. Income generated and expenditure incurred in a restricted fund will be legally subjected to the restrictions of the fund.

(iv) Transfer of funds

Generally, transfers of funds within the Foundation involve the transfer of available funds in the unrestricted funds of the Foundation to the unrestricted designated fund at the discretion of management as and when it is deemed appropriate and in furtherance of the objectives and purposes of the designated funds. Approval of transfers is made through a Directors' Resolution passed by the Board of Directors of the Foundation. The Foundation's practice is that no fund transfers are made out of the restricted funds to other funds established by the Foundation. However, unrestricted funds may be spent and transferred to the restricted funds to meet any overspending or deficit in the restricted funds, as approved by Board of Directors of the Foundation.

Notes to the Financial Statements

3.9 Incoming Resources

(i) Voluntary income (donations) and funds generating activities

Voluntary income (comprising donations from direct appeals, fundraising through newsletters and websites, outright donations and sponsorships) are recognised as income in the financial year as received or receivable when and only when all of the following conditions have been satisfied:

- the foundations obtains the right to receive the donation;
- it is probable that the economic benefits comprising the donations will flow to the Foundation; and
- the amount of donation can be measured reliably.

Incoming resources from the sale of goods from fund raising activities is recognised at the point of sale.

Donations-in-kind are recognised based on their estimated fair values.

The gross incoming resources in relation to funds raised or collected for the Foundation by individuals not employed or contracted by the Foundation, are the net proceeds remitted to the Foundation by the organisers of the event, after deducting their expenses.

Donations with restriction and/or conditions attached shall be recognised as income if the restrictions and conditions are under the Foundation's purview and it is probable that these restrictions and conditions would be met.

(ii) Investment income

Investment income comprises interest income on funds invested and is recognised on an accrual basis, using the effective interest method.

(iii) Charitable income (mainly dialysis services and medication fees)

Income from rendering dialysis and related medical services in the ordinary course of business is recognised when the Foundation satisfies a performance obligation (PO) by transferring control of a promised good or service to the customer. The amount of revenue recognised is the amount of the transaction price allocated to the satisfied PO.

The transaction price is allocated to each PO in the contract on the basis of the relative stand-alone selling prices of the promised goods or services. The individual standalone selling price of a good or service that has not previously been sold on a stand-alone basis, or has a highly variable selling price, is determined based on the residual portion of the transaction price after allocating the transaction price to goods and/or services with observable stand-alone selling prices. A discount or variable consideration is allocated to one or more, but not all, of the performance obligations if it relates specifically to those performance obligations.

The transaction price is the amount of consideration in the contract to which the Foundation expects to be entitled in exchange for transferring the promised goods or services. The transaction price may be fixed or variable and is adjusted for time value of money if the contract includes a significant financing component. Consideration payable to a customer is deducted from the transaction price if the Foundation does not receive a separate identifiable benefit from the customer. When consideration is variable, the estimated amount is included in the transaction price to the extent that it is highly probable that a significant reversal of the cumulative revenue will not occur when the uncertainty associated with the variable consideration is resolved.

Revenue may be recognised at a point in time or over time following the timing of satisfaction of the PO. If a PO is satisfied over time, revenue is recognised based on the percentage of completion reflecting the progress towards complete satisfaction of that PO.

Notes to the Financial Statements

3.10 Resources Expended

All expenditure is accounted for on an accrual basis and has been classified under headings that aggregate all costs related to the respective categories of incoming resources. Cost comprises direct expenditure including direct staff costs attributable to the relevant category of incoming resources. Where costs cannot be wholly attributable to a category of incoming resources, they have been apportioned on a basis consistent with the use of resources. Such costs relate to support costs which comprise of staff costs of the head office and maintenance of the IT infrastructure.

(i) Allocation of support costs

Support costs comprise staff costs of the head office relating to general management, human resource and administration, budgeting, accounting and finance functions, and maintenance of the IT infrastructure.

The costs have been specifically allocated to charitable activities and governance cost based on an 75:25 ratio, since the Foundation operates one head office that provides the overall governance for the Foundation and three dialysis centres that provide the dialysis services and medication.

No support costs were allocated to research activities.

(ii) Costs of generating funds

The costs of generating funds are those costs attributable to generating income for the Foundation, other than from undertaking charitable activities and includes an apportionment of support costs.

(iii) Costs of charitable activities

Costs of charitable activities comprise all costs incurred in undertaking its work in the pursuit of the charitable objects of the Foundation. The total costs of charitable expenditure include an apportionment of support costs.

(iv) Governance costs

Governance costs comprise all costs attributable to the general running of the Foundation, associated with the maintenance of the Foundation's governance infrastructure and in ensuring public accountability. These costs include costs related to constitutional and statutory requirements, and include an apportionment of support costs.

3.11 New standards and interpretations not adopted

A number of new standards, interpretations and amendments to standards are effective for annual periods beginning after 1 April 2020 and earlier application is permitted; however, the Foundation has not early adopted the new or amended standards and interpretations in preparing these financial statements.

The following new FRSs, interpretations and amendments to FRSs are not expected to have a significant impact on the Foundation's statement of financial position.

- *FRS 117 Insurance Contracts*
- *Classification of Liabilities as Current or Non-current* (Amendments to FRS 1)
- *Covid-19-Related Rent Concessions* (Amendment to FRS 116)
- *Reference to the Conceptual Framework* (Amendments to FRS 103)
- *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture* (Amendments to FRS 110 and FRS 28)
- *Property, Plant and Equipment – Proceeds before Intended Use* (Amendments to FRS 16)
- *Onerous Contracts – Costs of Fulfilling a Contract* (Amendments to FRS 37)
- *Annual Improvements to FRSs 2018 – 2020*

Notes to the Financial Statements

4 MEMBERS' GUARANTEE

The Foundation is a Foundation limited by guarantee whereby each member of the Foundation undertakes to meet the debts and liabilities of the Foundation, in the event of its liquidation, to an amount not exceeding \$100 per member.

Notes to the Financial Statements

11 GRANTS RECEIVED IN ADVANCE – RESTRICTED COMMUNITY SILVER TRUST FUNDS

The Community Silver Trust Fund (“CST”) was set up in November 2012 for government grants received from the Trustees of the Community Silver Trust. The Community Silver Trust is managed by the Ministry of Health on behalf of the Trustees. The grant received is used to improve the capability of the Foundation’s existing services in achieving higher quality care and affordable step down care.

The government grants received are first accounted for as grants received in advance and the utilisation of these grants are set out below:

	Note	2021 \$	2020 \$
Balance at the beginning of the year		2,228,512	1,642,927

Accrual for unutilised annual leave	42,768	35,196
	1,576,770	876,281

The Foundation’s exposures to currency and liquidity risks related to trade and other payables are disclosed in note 27.

Notes to the Financial Statements

13 RESTRICTED BUILDING FUND

The Building Fund was set up in November 2017 for the development of a new haemodialysis centre. San Wang Wu Ti Religious Society has pledged to donate an amount of \$1,000,000. A restricted Building Fund has been set up accordingly to account for this donation since January 2017. During the year, the Foundation has received a donation of \$101,665 (2020: \$389,072) from San Wang Wu Ti Religious Society.

14 RESTRICTED PATIENT WELFARE SUPPORT FUND

The Patient Welfare Support Fund ("PWS") was set up in June 2016 to fund the Adopt-A-Patient Scheme ("APS"). This fund is used strictly for the direct benefit of patients only. In addition to providing secondary funding for patients unable to cope with their out-of-pocket payment for dialysis treatment, the PWS Fund includes providing transportation subsidies, meal vouchers and other needs as approved by the Patient Programme Selection and Review ("PPSR") Committee. Patient eligibility is based on individual financial circumstances and determined by the Foundation's social workers and approved by the PPSR Committee.

	2021	2020
	\$	\$
Balance at beginning of the year	392,956	278,546
Donations received	249,307	147,853
Subsidies provided to patients	(25,225)	(33,443)
Balance at the end of the year	617,038	392,956

15 RESTRICTED RESEARCH FUND

The Research Fund consists of donations solicited and received by the Foundation for the purpose of supporting and funding research in the area for the prevention, treatment and cure of kidney and kidney related diseases. In November 2007, a memorandum of understanding was signed with The National University of Singapore, whereby identified research projects will be funded. Donations from the Research Fund will be channelled to the KDF-NUS Research Fund. To continue the collaboration established in 2007, a gift agreement was signed in July 2011. A minimum amount of \$1,750,000 was pledged towards the KDF-NUS Research Fund over a period of five years commencing from the financial year ended 31 March 2012.

In 2018, the Foundation signed a gift agreement with NUS for a funding of \$1,500,000 over 3 years for the research for prevention, treatment and cure of kidney and kidney related diseases.

In 2020, the Foundation transferred \$492,830 from the Unrestricted General Fund to the Restricted Research Fund to support the research. As at 31 March 2020, cumulative to date, the Foundation has donated \$3,650,000 to the KDF-NUS Research Fund.

In 2021, the Foundation transferred \$5,150 from the Restricted Research Fund to the Unrestricted General Fund as the KDF-NUS Research Fund was discontinued by the Foundation upon approval during the Annual General Meeting held on 22 August 2019.

16 RESTRICTION ON DISTRIBUTION OF RESERVES

The Foundation's Memorandum of Association provides that no portion of the income and property of the Foundation shall be paid by way of dividend, bonus or otherwise to the members of the Foundation.

Notes to the Financial Statements

17 INCOMING RESOURCES FROM GENERATED FUNDS

Donations received during the year are included as follows:

	2021	2020
	\$	\$
Voluntary income (donations)	2,671,156	2,578,206
Income from funds generating activities	648,182	1,217,306
Sponsorship	157,816	34,717
	3,477,154	3,830,229

During the year, the donations received comprise tax-deductible and non-tax-deductible donations of \$2,916,443 (2020: \$3,250,738) and \$560,712 (2020: \$579,491) respectively.

Sponsorships received in 2021 and 2020 comprised cash sponsorship .

18 INVESTMENT INCOME

	2021	2020
	\$	\$
Interest income on fixed deposits	442,755	650,409

19 CHARITABLE INCOME

	2021	2020
	\$	\$
Dialysis services and medication fee	3,162,357	2,741,348
Less: Subsidies provided by the Foundation to patients	(568,238)	(423,921)
	2,594,119	2,317,427

20 GOVERNMENT SUBSIDIES

Government subsidies received of \$3,377,612 (2020: \$3,196,458) are recognised under charitable activities as incoming resources in the statement of income and expenditure and other comprehensive income to fund the related expenditure incurred during the financial year.

The Foundation receives government subsidies on dialysis services provided to patients who meet the Ministry of Health's criteria for subsidised haemodialysis and peritoneal dialysis. The government subsidies received for peritoneal dialysis are remitted to the peritoneal dialysis solution provider.

The Foundation also receives grants from the Community Silver Trust. The CST provides a dollar-for-dollar matching grant administered by the Ministry of Health. The grant received is used to improve the capability of the Foundation's existing services in achieving higher quality care and affordable step-down care.

Notes to the Financial Statements

The related expenditures charged to the statement of income and expenditure and other comprehensive income that were funded through CST grants are set out below:

	Note	2021 \$	2020 \$
Operating expenditures	11	1,240,012	1,804,406
Depreciation of plant and equipment	24	99,660	159,889
Amortisation of intangible assets	24	18,937	67,084
		1,358,609	2,031,379

21 COSTS OF GENERATING VOLUNTARY INCOME

	2021 \$	2020 \$
Direct mailing materials and services	252,553	271,396
Staff costs	209,822	330,782

24 NET SURPLUS FOR THE YEAR

Net surplus for the year includes the following:

	Note	2021	2020
		\$	\$
External audit fees		43,450	37,700
Internal audit fees		24,275	22,892
Depreciation of plant and equipment			
- General fund		150,868	125,310
- CST	20	99,660	159,889
Amortisation of intangible assets			
- General fund		10,873	11,001
- CST	20	18,937	67,084
Gain on disposal of plant and equipment		(23,023)	(2,990)
Reversal of impairment loss on trade receivables		-	(225)
Short-term leases		26,760	32,216
Amortisation of deferred capital grants	10	(118,597)	(226,973)
Special Employment & Wage Credit Scheme		(36,561)	(12,829)
Jobs Support Scheme grant		(414,813)	-

In 2021, the Foundation received \$442,269 in relation to Jobs Support Scheme grant ("JSS"). JSS is a wage subsidy programme introduced in Singapore in response to the COVID-19 coronavirus pandemic. The grant is recognised in the statement of income and expenditure as 'other income' on a systematic basis over the periods in which the Foundation recognises the related expenses. As a result, \$414,813 was recognised as other income in 2021 and the residual amount of \$27,456 was deferred and recognised as other payables as at 31 March 2021.

Total staff cost of \$2,751,863 (2020: \$2,318,109) includes contributions to defined contribution plan amounting to \$278,469 (2020: \$230,141).

25 TAXATION

The Foundation is registered as a charity under the Charities Act, Chapter 37. With effect from YA2008, all registered charities are not required to file income tax returns and will enjoy automatic income tax exemption. No provision for taxation has been made in the Foundation's financial statements.

Notes to the Financial Statements

26 RELATED PARTIES

For the purpose of these financial statements, parties are considered to be related to the Foundation if the Foundation has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Foundation and party are subject to common control or common significant influence. Related parties may be individuals or other entities.

Key management compensation

Key management personnel, who are the trustees/office bearers, of the Foundation are those persons having the authority and responsibility for planning, directing and controlling the activities of the Foundation. The Board of Directors and the General Managers (including human resources, finance, nursing and social work) are considered as key management personnel of the Foundation. The Board of Directors of the Foundation renders its services on a voluntary basis and does not receive any remuneration. However, the General Managers received remuneration that is approved by the Board of Directors.

	Salaries	AWS and variable bonus	Contributions to Central Provident Fund	Total
	\$	\$	\$	\$
31 March 2021				
Key management personnel	350,868	42,993	56,526	450,387
31 March 2020				
Key management personnel	291,419	44,887	52,662	388,968

During the financial year, no other key management personnel received any reimbursement of expenses, allowances or any other forms of payments, except as described above.

Other related party transactions

The aggregate value of transactions and outstanding balances with key management personnel and entities over which they have control or significant influence were as follows:

	Transaction value for the year ended 31 March		Balance outstanding as at 31 March	
	2021	2020	2021	2020
	\$	\$	\$	\$
Type of services rendered				
Internal audit services	24,275	22,892	–	–

A Director of the Foundation also sits on the Board of Directors of another non-profit organisation, Shared Services for Charities Limited. The selection of internal audit services was based on the Foundation's tender and procurement process, which takes into consideration the price, professional competency and objectivity, robustness and meticulousness of the proposed internal audit approach as important selection criteria.

Other than the above, there are no other related party transactions during the year.

Notes to the Financial Statements

27 FINANCIAL INSTRUMENTS

Financial risk management

Overview

The Foundation has exposure to the following risks arising from financial instruments:

- credit risk
- liquidity risk
- market risk

This note presents information about the Foundation's exposure to the above risks, the Foundation's objectives, policies and processes for measuring and managing risk, and the Foundation's management of capital.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Foundation's risk management framework. The Board has established the Audit Committee, which is responsible for developing and monitoring the Foundation's risk management policies. The Audit Committee reports regularly to the Board of Directors on its activities.

The Foundation's risk management policies are established to identify and analyse the risks faced by the Foundation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Foundation's activities. The Foundation, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Foundation's Audit Committee oversees how management monitors compliance with the Foundation's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Foundation. The Foundation's Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

Credit risk

Credit risk is the risk of financial loss to the Foundation if a counterparty to a financial instrument fails to meet its contractual obligations, and arises primarily from the Foundation's cash and cash equivalents and trade and other receivables.

The carrying amounts of financial assets represent the Foundation's maximum exposure to credit risk, before taking into account any collateral held. The Foundation does not hold any collateral in respect of its financial assets.

Trade receivables

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis.

The Foundation establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade receivables. The main components of this allowance are specific loss component that relates to individually significant exposures, and collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets.

Notes to the Financial Statements

Exposure to credit risk

The exposure to credit risk for trade receivables at the reporting date by counterparty was:

	Carrying amount	
	2021	2020
	\$	\$
Corporate – insurance providers	1,111,762	513,529
Individual patients	21,696	677
	1,133,458	514,206

The carrying amount of the Foundation's most significant customer, an insurance provider was \$809,352 (2020: \$161,353) at 31 March 2021.

Impairment losses

A summary of the exposures to credit risk for trade and other receivables at the reporting date is as follows:

	2021		2020	
	Not credit impaired	Credit impaired	Not credit impaired	Credit impaired
	\$	\$	\$	\$
Not past due	265,267	–	185,102	–
Past due 1-30 days	373,958	–	7,226	–
Past due 31-60 days	399,362	–	321,878	–
Past due 61-90 days	94,871	–	–	–
Past due more than 365 days	–	1,486	–	1,486
Total gross carrying amount	1,133,458	1,486	514,206	1,486
Loss allowance	–	(1,486)	–	(1,486)
	1,133,458	–	514,206	–

The Foundation's credit impaired trade receivables of \$1,486 as at 31 March 2021 (2020: \$1,486) related to a few patients that have informed the Foundation of their inability to pay for the outstanding invoices due to financial difficulties. In 2020, the Foundation has made full allowance for impairment losses on these receivables.

Expected credit loss assessment for trade receivables as at 31 March 2021

The Foundation uses an allowance matrix to measure the ECLs of trade receivables from individual customers, which comprise a very large number of small balances.

Loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Roll rates are calculated separately for exposures in different segments based on the following common credit risk characteristics - geographic region, age of customer relationship and type of product purchased.

Notes to the Financial Statements

The following table provides information about the exposure to credit risk and ECLs for trade receivables for customers as at 31 March:

	Weighted average loss rate	Gross carrying amount \$	Impairment loss allowance \$	Credit impaired
2021				
Current (not past due)	–	265,267	–	No
1 – 30 days past due	–	373,958	–	No
31 – 60 days past due	–	399,362	–	No
61 – 90 days past due	–	94,871	–	No
More than 365 days past due	100%	1,486	(1,486)	Yes
		<u>1,134,944</u>	<u>(1,486)</u>	
2020				
Current (not past due)	–	185,102	–	No
1 – 30 days past due	–	7,226	–	No
31 – 60 days past due	–	321,878	–	No
61 – 90 days past due	–	–	–	No
More than 365 days past due	100%	1,486	(1,486)	Yes
		<u>515,692</u>	<u>(1,486)</u>	

Loss rates are based on actual credit loss experience over the past four years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historic data has been collected, current conditions and the Foundation's view of economic conditions over the expected lives of the receivables. Scalar factors are based on actual and forecast Singapore Consumer Price Index Growth rate.

Movements in allowance for impairment in respect of trade receivables

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

	Lifetime ECL	
	2021	2020
	\$	\$
Balance at beginning of the year	1,486	1,711
Reversal of allowance – bad debts recovered	–	(225)
Balance at the end of the year	<u>1,486</u>	<u>1,486</u>

Cash and cash equivalents

The Foundation held cash and cash equivalents of \$43,502,367 at 31 March 2021 (2020: \$37,487,202). The cash and cash equivalents are held with bank counterparties, which are rated from A3 to Aa1 (2020: A3 to Aa1), based on Moody's ratings, except for fixed deposits of \$8,536,345 which has been placed with a financial institution with no available credit rating.

Impairment on cash and cash equivalents has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Foundation considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties. The amount of the allowance on cash and cash equivalents is insignificant.

Notes to the Financial Statements

Interest receivables, other receivables and deposits

Impairment on these balances has been measured on the 12-month expected loss basis which reflects the low credit risk of the exposures. The amount of the allowance on these balances is insignificant.

Liquidity risk

The Foundation has minimal exposure to liquidity risk as its operations are funded by government grants and subsidies, as well as donations from corporations and individuals. The Foundation has ensured sufficient liquidity through the holding of highly liquid assets in the form of cash and cash equivalents at all times to meet its financial obligations when they fall due. The cash flow maturity of the grants received in advance is identified based on the respective funding projects' agreed time period with Ministry of Health (note 11). Cash outflows of these balances are only expected when the project expired with unutilised funding balances.

Fixed deposits are placed with reputable financial institutions, which yield better returns than cash at bank. The fixed deposits generally have short-term maturities so as to provide the Foundation with the flexibility to meet working capital needs. All fixed deposits mature within one year.

The following are the expected contractual undiscounted cash outflows of financial liabilities, including interest payments and excluding the impact of netting agreements:

	Carrying amount	Cash flows		
		Contractual cash flows	Within 1 year	Between 1 to 5 years
	\$	\$	\$	\$
2021				
Non-derivative financial liabilities				
Trade and other payables	1,576,770	(1,576,770)	(1,576,770)	–
2020				
Non-derivative financial liabilities				
Trade and other payables	876,281	(876,281)	(876,281)	–

Market risk

Market risk is the risk that changes in market prices, such as interest rate and foreign exchange rates will affect the Foundation's income or value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising returns.

The Foundation's exposure to market risk for changes in interest rates relates primarily to the Foundation's investment portfolio.

Interest rate risk

At the reporting date, the interest rate profile of the Foundation's interest-bearing financial instruments was as follows:

	2021 \$	2020 \$
Fixed rate instruments		
Fixed deposits	38,149,424	35,358,656

The Foundation does not account for any fixed rate financial assets at fair value through statement of income and expenditure. Therefore, changes in interest rates at the reporting date would not affect the Foundation's statement of income and expenditure.

Notes to the Financial Statements

Foreign currency risk

The financial assets and liabilities of the Foundation are primarily denominated in Singapore dollars. The Foundation has no significant exposure to foreign currency risk.

Capital management

The Foundation defines “capital” to be the unrestricted funds and restricted funds. The primary objective of the Foundation is to ensure that it maintains a healthy capital position through donations and government grants to sustain its operations.

There are no changes in the Foundation’s approach to capital management during the year. The Foundation is not subject to any externally imposed capital requirements.

Estimating the fair values

The fair values of other financial assets and liabilities with a maturity of less than one year (including trade and other receivables, cash and cash equivalents, trade and other payables and grant received in advance) are assumed to approximate their fair values because of their short period to maturity.

Fair value versus carrying amounts

The fair values of recognised financial assets and liabilities together with the carrying amounts shown in the statement of financial position are as follows:

	Note	Amortised cost \$	Other financial liabilities \$	Total carrying amount \$	Fair value \$
31 March 2021					
Cash and cash equivalents	9	43,502,367	–	43,502,367	43,502,367
Trade and other receivables*	7	1,413,186	–	1,413,186	1,413,186
		44,915,553		44,915,553	44,915,553
Trade and other payables	12	–	(1,576,770)	(1,576,770)	(1,576,770)
31 March 2020					
Cash and cash equivalents	9	37,487,202	–	37,487,202	37,487,202
